Professional Summary

Site & Technical Office Architect with **8+ years of experience** in site supervision, technical office operations, shop drawings and finishing works on commercial, residential, hospitality, tourism and mixed-use projects. Supervises finishing and fit-out works, coordinates subcontractors and labour, and inspects work against approved drawings and specifications through snag close-out and handover. Prepares shop and coordination drawings, RFIs, material submittals, take-offs, BOQs and as-built drawings, and coordinates with consultants, contractors and suppliers. **Registered with the Saudi Council of Engineers.**

Work Experience

Site Architect

Aug 2024 – Feb 2026

Deyar Engineering and Contracting Company

LATEST

- Supervised the daily execution of architectural finishing works in accordance with approved drawings, specifications and materials.
- Monitored subcontractors and labour, coordinated work sequences and kept work fronts available to support the project schedule.
- Inspected flooring, walls, ceilings, gypsum board, painting, doors and wet areas before consultant inspection.
- Coordinated with consultant, MEP and structural teams to resolve site interfaces, maintain quality, close snags and support handover.

Technical Office & Interior Finishing Engineer

May 2022 – Mar 2024

Sharm Hills Real Estate Investment Company · Egypt

- Prepared and reviewed architectural drawings, fit-out drawings, finishing details and modifications for residential and resort projects.
- Supervised interior and exterior finishing: flooring, ceilings, gypsum board, wall finishes, painting, doors and wet areas.
- Coordinated shop drawings, material submittals, samples, quantity take-offs and technical documentation with contractors and suppliers.
- Supported snagging, as-built updates, handover documentation and technical solutions for finishing and decoration packages.

Technical Office Engineer

Mar 2018 – Aug 2022

Deyar Engineering and Contracting Company

- Led technical office and site coordination for residential and mixed-use projects, aligning drawings, materials, execution and approvals.
- Prepared shop drawings, coordination drawings, fit-out details, construction details and as-built drawings.
- Developed and coordinated Revit models across architectural, structural and MEP disciplines.
- Prepared RFIs, material submittals, WIRs, IRs, MIRs, quantity take-offs, BOQs and technical progress updates.
- Supervised finishing and fit-out works, resolved site conflicts, and ran QA/QC inspections, snagging and handover.

Architectural Drafting & Site Support

Mar 2015 – May 2018

Freelance

- Prepared architectural drawings, design modifications and construction details; supported site follow-up and technical coordination.

Key Strengths

- Site supervision & execution of all finishing works
- Technical office & shop drawings
- Subcontractor, labour & work-sequence coordination
- Coordination drawings & finishing details
- Finishing inspections & execution quality
- RFIs, material submittals & as-built drawings
- QA/QC inspections, snagging & handover
- WIRs, IRs, MIRs & technical documentation
- Coordination with consultants, contractors & suppliers
- BOQs, quantity take-offs & cost estimation
- Interior fit-out & decoration coordination
- Revit & BIM coordination with MEP / structural teams
